| Insurance and Diagnostic Services Act, c. 28, 1956-57, as amended..... | (30) | \$ 189,368,503 |
|--|------|----------------|

The Act authorizes the Minister, with the approval of the Governor in Council, to enter into an agreement with any province to provide for the payment by Canada of contributions towards the cost of insured hospital and diagnostic services incurred by the province.

The Act provides that Canada's contribution shall be paid in respect of each calendar year and that the amount of the contribution to each province is to be based on a formula which gives consideration to (a) the per capita costs of in-patient services in Canada; (b) the per capita cost of in-patient services in the province; (c) the cost of out-patient services in the province; (d) the proportion of the population of the province entitled to insured services, and (e) the proportion of the year during which an agreement existed. A formula, similar in effect, is prescribed by the regulations for the calculation of monthly advances on account of contributions.

Agreements have been made with Newfoundland, Manitoba, Saskatchewan, Alberta and British Columbia effective from July 1, 1958, with Nova Scotia and Ontario effective from January 1, 1959, with New Brunswick effective from July 1, 1959, with Prince Edward Island effective from October 1, 1959, with the Northwest Territories effective from April 1, 1960, with the Yukon Territory effective from July 1, 1960 and with Quebec effective from January 1, 1961.

Family allowances payments, Family Allowances Act, c. 109, R.S., as amended.. (25) \$ 506,191,647

The above Act, as amended, provides for payment of monthly allowances for all eligible children under the age of sixteen years who are resident in Canada. For administrative purposes, regional offices of the Family Allowances Division have been established in each provincial capital.

While application for registration of a child for family allowances is made by both parents, the allowances are normally paid to the female applicant, except in most unusual circumstances. There are certain eligibility requirements set out in the legislation including maintenance by the parent, school attendance, etc. The scale of monthly payment for each child is as follows: for children under 10 years of age—\$6 per month; for children from 10 to 16 years of age—\$8 per month. Payment ceases with the payment for the month in which the child reaches the age of 16 years.

Payments of allowances are made under authority of the Act, from unappropriated moneys in the Consolidated Revenue Fund; while the administrative expenses are payable out of moneys appropriated by Parliament for the purpose (Vote 252).

P.C. 5093, August 3, 1945, as amended, authorizes the payment of family allowances for eligible Eskimo and Indian children to the Department of Northern Affairs and National Resources and the Indian Affairs Branch of the Department of Citizenship and Immigration, where it is in the best interests of the child. Disbursements, on behalf of children in respect of whom allowances are paid, are made from the relevant Deposit and Trust Accounts of those departments.

A distribution, by provinces, of payments made to parents or other parties responsible for the maintenance of children eligible for such allowances follows:

The buildings are located at frontier points, generally on international roads where traffic is limited and does not warrant the construction of more permanent facilities by the Department of Public Works.

The unexpended balance in this vote was due to changes in the construction programs by provincial highways departments and delays in construction due partly to weather conditions.

*Awarded by the Department of Public Works.

The variation between the amount provided in this appropriation and the expenditures charged thereto is due to the following reasons: (a) the progress on construction of roads and bridges in the Cambridge Bay, Fort Fitzgerald, Fort Smith and Frobisher Bay areas and along the Mackenzie Highway was delayed by inclement weather; (b) the construction of buildings in various regions of the Arctic and in the Mackenzie district could not be completed as planned due to materials being delivered too late in the fiscal year.

POST OFFICE DEPARTMENT

Under authority of the Post Office Act, c. 212, R.S., as amended, the Post Office Department, under the direction of the Postmaster General, is entrusted with the management and operation of the postal services of Canada and the Post Office Savings Bank. In addition, the Department performs certain services of an agency nature for other departments (without remuneration in some instances), the most important of which are: receiving payments on Government annuities; selling unemployment insurance stamps; and making available to the public certain forms and literature issued by Government Departments.

Post Offices are divided into two main groups, namely staff offices and revenue offices. The postmasters and staffs of the staff offices are paid from parliamentary appropriations. Postmasters of revenue offices and their staffs are paid by salary warrants issued by headquarters of the Post Office Department and charged to Postal Revenue.

Appendix 1 to this section contains the Departmental Balance Sheet as at March 31, 1961 and Statement of Revenue and Expenditure for the year ended March 31, 1961.

A Contracts were awarded through the Department of Public Works, unless otherwise stated.

B Expenditures included \$1,431,331 representing the net cost of 668 cars, 18 trucks, 1 bus, 5 motorcycles, 3 snowmobiles, 1 tractor, 31 motor boats, 32 radio transmitters, 8 despatch control consoles, 8 repeater controls, 8 despatcher switchboards, 8 multiplex units, 3 radio repeater stations, 1 radio relay and control, 3 radar speedmeters, 3 electromatic speedmeters, 1 lighting plant and miscellaneous aircraft and radio equipment.

The unexpended balance in this vote resulted from slower progress than expected in winter works projects, the actual cost of the Inuvik, N.W.T. project being less than the amount forecast and delays in the replacement of motor vehicles.

This vote was provided to meet the costs of operation and maintenance, including salaries of civilian employees, of the Marine Division. This division is employed in the enforcement of federal statutes along the seaboards and inland waterways and in assisting land divisions in the transport of personnel and carrying out police investigations in areas where water transportation is necessary. A particular duty is the enforcement of those sections of the Customs Act relating to smuggling including the maintenance of preventive patrols.

A The following was the strength in the various commissioned and non-commissioned ranks as at March 31, 1961: 2 superintendents, 5 inspectors, 1 sub-inspector, 11 staff-sergeants, 23 sergeants, 33 corporals, 27 constables and 130 marine constables. General rates of pay are given under Vote 372.

The Commissioner is authorized to engage marine constables under authority of the Royal Canadian Mounted Police Act. The annual rates of pay range from \$3,000 to \$5,300.

B Expenditures comprised: plain clothes allowance, \$145; kit upkeep allowance, \$20,772; special northern subsistence allowance, \$1,978; married accommodation allowance, \$45,591. General rates of allowances are given under Votes 372 and 374.

C Payment was made to the Department of Veterans Affairs—see Vote 372.

D Expenditures were for provisions, mess ration allowances and fuel for cooking.

Revenues arising from services provided through the above expenditures amounted to \$21,080 and included \$15,379 for deductions from pay of members for meals and rations.

| | (16) <u>\$ 127,934</u> | <u>\$ 127,934</u> | <u>\$ 83,883</u> |

The unexpended balance in this vote was due to incompleteness of a 35 foot shallow draft boat for the West Coast as a winter works program item and a saving in normal requirements of sea going equipment due to the withdrawal of the R.C.M.P. ship *Irvine* from active sea duty.

NOTE.—As at December 31, 1960, a number of claims had been presented to the Custodian in respect of the administration of vested assets. The degree of recognition which will be given to these claims has not yet been determined.

Certified correct.

R. M. SÈRRE,
Comptroller.

Approved.

M. ROBITAILLE,
Assistant Deputy Custodian.

I have examined the accounts of the Custodian for the year ended December 31, 1960 and have obtained all the information and explanations I have required.

The Addendum to the Statement of Assets and Liabilities explains the bases used in recording the various classes of assets vested in the Custodian, and no changes were made in these bases during the year under review.

As in previous years income earned from cash funds vested in the Custodian, and from investments acquired from such funds, has been recorded as income of the Custodian.

Subject to the above comments the Statement of Assets and Liabilities and the related Statement of Income and Expense, which have been prepared on a basis consistent with the preceding year, are, in my opinion, properly drawn up so as to exhibit a true and fair view of the state of affairs of the Custodian as at December 31, 1960, and the results of his operations for the year ended on that date, according to the best of my information and the explanations given to me and as shown by the books of the Custodian.

A. M. HENDERSON,
Auditor General of Canada.

A The changes during the year consisted of (a) the decrease in the capital cost of Canadian Government Railways properties entrusted to the Canadian National Railways covering the capital costs of the S.S. *Scotia 1* (\$366,807) which has been declared surplus to the Crown Assets Disposal Corporation and of the S.S. *Scotia 2* (\$348,948) which has been placed in the Prince Edward Island Ferry Service and (b) the increase covering the book value of \$5,666 for land transferred by the National Harbours Board to the Department of Transport and entrusted to the Canadian National Railways under authority of P.C. 1960-616, May 5, 1960.

B P.C. 1960-768, June 2, 1960, authorized the transfer of land at the book value \$118,754, situated in the City of Quebec, to the Department of Public Works.

C The increase during the year consisted of the construction of vessels and harbour facilities for the Newfoundland Coastal Services under Vote 426 (1960-61).

D For details—see above S.S. *Scotia 2*.

E The decrease represents an entry to record the reduction in the book value of the Canadian National Railways capital stock arising in the calendar year 1960 due to capital losses by the railway on account of the early retirement of steam locomotives (see Canadian National Railways Annual Report, 1960).

*Amounts shown in the first column under "Estimates" represent the capital budget as originally presented by the National Harbours Board through the Minister of Transport and subsequently approved by Parliament. Those in the second column represent the details of the voted appropriations provided by Parliament and those in the third column, the net expenditures made from these appropriations.

In accordance with section 29 of the National Harbours Board Act, c. 187, R.S., as amended, certificates of indebtedness for \$575,654, bearing interest at 5 per cent per annum, were issued to the Government of Canada to cover the above expenditures.

Expenditures reported under contracts include amounts charged to appropriations and to the replacement fund and the Board's revenues where applicable.

The variation between the appropriation and the total of expenditures charged thereto, namely, the sum of \$2,004,645, was due in part to the fact that some of the year's expenditures were charged to the Board's own funds rather than to the appropriation; the major portion of the variation, however, was attributable to lapsing balances in four projects. Of these, one was not proceeded with, another barely got underway and the work on the remaining two did not proceed as rapidly as planned. These four projects were again provided for in the main Estimates, 1961-62.

*Amounts shown in the column under "Estimates" represent the capital budget as originally presented by the National Harbours Board through the Minister of Transport and subsequently approved by Parliament. Those in the second column represent the details of the voted appropriations provided by Parliament and those in the third column, the net expenditures made from these appropriations.

Expenditures reported under contracts include amounts charged to appropriations and to the replacement fund and the Board's revenues where applicable.

Details of expenditure covered by the transfer of \$52,800 from Vote 456 were as follows:

| | <u>\$ 52,800</u> | <u>\$ 52,800</u> | <u>\$ 52,492</u> |

In accordance with section 29 of the National Harbours Board Act, c. 187, R.S., as amended, certificates of indebtedness for \$11,616,979, bearing interest at 5 per cent per annum, were issued to the Government of Canada to cover the total expenditures.

Of the variation of \$4,393,521 between the appropriation and the total of expenditures charged thereto, \$1,757,000 was accounted for by expenditures which were charged to the Board's own funds rather than to the appropriation. As regards the remainder of the variation, some of the reasons for the lapsing balances in projects were: delays in the preparation of necessary plans; the receiving of bids which were more favourable than expected; the fact that more work was performed in 1959 than was anticipated at the time the 1960-61 Estimates were submitted; the decision not to proceed with certain purchases; and, in one instance, delay in the execution of the work owing to a strike at a steel plant.

CROWN ASSETS DISPOSAL CORPORATION—*Concluded*

AUDITOR GENERAL OF CANADA

Ottawa, June 16, 1961.

THE HONOURABLE RAYMOND O'HURLEY,
MINISTER OF DEFENCE PRODUCTION,
OTTAWA.

Sir,

The accounts and financial statements of Crown Assets Disposal Corporation have been examined for the year ended March 31, 1961, and I now report thereon in compliance with the requirements of section 87 of the Financial Administration Act.

In my opinion:

- (a) proper books of account have been kept by the Corporation;
- (b) the financial statements of the Corporation
 - (i) were prepared on a basis consistent with that of the preceding year and are in agreement with the books of account,
 - (ii) in the case of the balance sheet, give a true and fair view of the state of the Corporation's affairs as at the end of the financial year, and
 - (iii) in the case of the statement of income and expense, give a true and fair view of the income and expense of the Corporation for the financial year; and
- (c) the transactions of the Corporation that have come under my notice have been within the powers of the Corporation under the Financial Administration Act and any other Act applicable to the Corporation.

During the year the balance of \$38,366 in the reserve for workmen's compensation costs was transferred to the surplus account and remitted to the Receiver General of Canada. This action resulted from a decision of the Board of Directors that all future payments with respect to awards made to former employees or their dependents under the provisions of the Government Employees Compensation Act were to be treated as current operating expenses.

During the year under review a firm of management consultants, retained by the management, completed an examination of the operations of the Corporation. As a result of this examination, a number of recommendations designed to effect operating economies were submitted to and accepted by the management of the Corporation. While the volume of business handled during the past year reflects an increase over the previous year, expenses have remained approximately the same. The recommendations of the management consultants referred to were put into effect progressively throughout the year.

Yours faithfully,

A. M. HENDERSON,
Auditor General of Canada.

CANADIAN BROADCASTING CORPORATION—*Concluded*

AUDITOR GENERAL OF CANADA

Ottawa, June 28, 1961.

THE HONOURABLE J. W. MONTEITH,
ACTING MINISTER OF NATIONAL REVENUE,
OTTAWA.

Sir,

The accounts and financial statements of the Canadian Broadcasting Corporation have been examined for the year ended March 31, 1961, and I now report thereon in compliance with the requirements of section 87 of the Financial Administration Act.

In my opinion:

- (a) proper books of account have been kept by the Corporation;
- (b) the financial statements of the Corporation
 - (i) were prepared on a basis consistent with that of the preceding year and are in agreement with the books of account,
 - (ii) in the case of the balance sheet, give a true and fair view of the state of the Corporation's affairs as at the end of the financial year, and
 - (iii) in the case of the statement of operations, give a true and fair view of the operations of the Corporation for the financial year; and
- (c) the transactions of the Corporation that have come under my notice have been within the powers of the Corporation under the Financial Administration Act and any other Act applicable to the Corporation.

The working capital of the Corporation has been increased during the year under review from \$6 million to \$9 million to finance increased inventories. This increase of \$3 million was provided for under Vote 759, Appropriation Act, No. 2, 1961, while under Order in Council P.C. 1961-3/453 of March 30, 1961 the Governor in Council directed that the advance be free of interest and be subject to review by Treasury Board from time to time. The amount of the advance has been credited to the Proprietor's Equity Account in accordance with Section 33 of the Broadcasting Act.

During the year under review the Corporation spent \$5,583,828 on capital expenditures. During the last two years \$964,000 was expended in connection with the proposed consolidation of facilities in Toronto and Montreal. The estimate of the cost of the proposed consolidation for Toronto, Montreal and Ottawa is set forth in summary form in the Minutes of Proceedings of the Special Committee on Broadcasting (Appendix B of No. 27 of June 7, 1961, page 804) and amounts to \$46,560,000 during the five year period ending March 31, 1966 together with \$26,986,000 required subsequently to complete the projects. The total estimated cost of the projects was approved by the Board of Directors on 30th October, 1959 and submitted to the Minister of National Revenue and the Minister of Finance in accordance with section 35(2) of the Broadcasting Act, on 6th November 1959. The funds required are provided annually by parliamentary appropriation.

The Minutes of Proceedings of the Special Committee on Broadcasting (Appendix of No. 26 of June 1, 1961, pages 744-51) contain a copy of my report to the Board of Directors dated June 21, 1960, covering the examination of the accounts of the Corporation for the financial year ended March 31, 1960. This report drew to the attention of the Board various weaknesses in the system of internal control and contained recommendations designed to correct these weaknesses. In the course of our examination of the accounts of the Corporation for the year under review, it was found that a number of the matters previously noted had been remedied while others are currently under review.

Yours faithfully,

A. M. HENDERSON,
Auditor General of Canada.

AUDITOR'S REPORT

TO THE HONOURABLE THE MINISTER OF TRANSPORT,
OTTAWA, CANADA.

I have examined the consolidated balance sheet of the Canadian National Railway System at December 31, 1960 and the consolidated income statement for the year ended on that date. My examination included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as I considered necessary in the circumstances.

In my opinion, subject to the position with regard to depreciation accruing prior to the adoption of depreciation accounting as referred to in Note 1, the accompanying consolidated balance sheet and the related consolidated income statement are properly drawn up so as to give a true and fair view of the state of the affairs of the System at December 31, 1960 and of the results of its

operations for the year ended on that date according to the best of my information and the explanations given to me and as shown by the books of the System, and in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year, except for the change in the method of funding of liabilities under the Company's Pension Plans as referred to in Note 4.

I further report that, in my opinion, proper books of account have been kept by the System and the transactions that have come under my notice have been within the powers of the System.

J. A. DE LAI ANNE,
Chartered Accountant.

February 27, 1961.

CANADIAN NATIONAL RAILWAYS—Continued**Notes to Consolidated Financial Statements at December 31, 1960****Note 1: Property Investment**

Additions since January 1, 1923 have been recorded at cost and properties and equipment brought into the System at January 1, 1923 are included at the values appearing in the books of the several railways now comprising the System to the extent that these have not been retired or replaced.

Depreciation on Canadian Lines: Depreciation accounting as adopted for equipment in 1940, for hotel properties in 1954 and for track and road structures and all other physical properties except land in 1956 has been continued in 1960. The depreciation rates used are based on the estimated service life of the properties but do not provide for depreciation which was not recorded in prior years under the replacement and retirement accounting principles then in force, nor for extraordinary obsolescence resulting from the introduction of more efficient equipment. Consistent with the policy adopted in the year 1958, capital losses of \$26,651,968 sustained in 1960 on the early retirement of steam locomotives have been charged against Shareholders' Equity. The total of such losses charged to Shareholders' Equity up to December 31, 1960 amounted to \$36,555,118.

Depreciation on U.S. Lines: Replacement accounting for track and depreciation accounting for equipment and other physical property except land has been continued in accordance with the regulations of the Interstate Commerce Commission.

Note 2: Material and Supplies

The inventory has been priced at laid down cost based on weighted average cost for ties, rails and fuel and latest invoice price for new materials in general stores, and at estimated utility or sales value for usable second hand, obsolete and scrap materials.

Note 3: Capital Stock

The capital stock of the Canadian National Railway Company (other than the four per cent preferred stock) and the capital investment of Her Majesty in the Canadian Government Railways are included in the net debt of Canada and disclosed in the historical record of government assistance to railways as shown in the Public Accounts of Canada.

Note 4: Pensions

The funding of liabilities under the Company's 1935, 1952 and 1959 Pension Plans has been changed from a terminal funding method to a form of current funding. This resulted in a reduction of \$10.2 million in pension costs charged to 1960 operations compared with 1959. The Company has given a written acknowledgement to the Trustee of the Pension Funds for the outstanding liability amounting to \$325,000,000 in respect of prior service of active employees. No change has been made relative to pensions granted under prior plans. The Reserve for Pensions (including members' contributions) at December 31, 1960 amounted to \$703,839,892.

Note 5: Major Commitments**(a) Chicago & Western Indiana Railroad Company:**

Pursuant to a joint supplemental lease dated May 1, 1952, the Grand Trunk Western Railroad Company and four other proprietary-tenant companies are obligated to pay, as rental, sinking fund payments sufficient to retire bonds at maturity and interest as it falls due with respect to First Collateral Trust Mortgage 4½% Sinking Fund Bonds Series "A" due May 1, 1982. The Grand Trunk Western's proportion is one-fifth in the absence of default of any of the other tenant companies. The bonds outstanding at December 31, 1960 total \$51,311,000.

(b) Detroit & Toledo Shore Line Railroad Company:

The Grand Trunk Western Railroad Company is jointly and severally liable as guarantor of principal, interest and sinking fund payments with respect to \$2,713,000 First Mortgage 3¼% 30 year Series "A" Bonds, due December 1, 1982, of the Detroit & Toledo Shore Line Railroad Company.

J. A. DE LALANNE

CHARTERED ACCOUNTANT

507 PLACE D'ARMES, MONTREAL

March 15, 1961.

TO THE HONOURABLE THE MINISTER OF TRANSPORT,
OTTAWA, CANADA

Sir:

As auditor of the Canadian National Railway System, I report, through you, to Parliament on my audit of the accounts for the year ended December 31, 1960.

I have signed a separate report in the following terms which, together with the related financial statements, is included in the annual report of the System.

"I have examined the consolidated balance sheet of the Canadian National Railway System at December 31, 1960 and the consolidated income statement for the year ended on that date. My examination included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as I considered necessary in the circumstances.

In my opinion, subject to the position with regard to depreciation accruing prior to the adoption of depreciation accounting as referred to in Note 1, the accompanying consolidated balance sheet and the related consolidated income statement are properly drawn up so as to give a true and fair view of the state of the affairs of the System at December 31, 1960 and of the results of its operations for the year ended on that date, according to the best of my information and the explanations given to me and as shown by the books of the System, and in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year, except for the change in the method of funding of liabilities under the Company's Pension Plans as referred to in Note 4.

I further report that, in my opinion, proper books of account have been kept by the System and the transactions that have come under my notice have been within the powers of the System."

I offer the following further comments:

PROPERTY INVESTMENT

Expenditures on additions to property were lower in 1960 than in any year since 1955, while depreciation accruals were the highest, as shown in the following table:

| | Expenditures | Depreciation accruals |
|------------|---------------|--------------------------|
| 1960 | \$169,823,000 | \$88,712,000 |
| 1959 | 222,070,000 | 86,311,000 |
| 1958 | 247,144,000 | 72,338,000 |
| 1957 | 255,428,000 | 78,660,000 |
| 1956 | 203,300,000 | 63,851,000 |

The lower expenditure in 1960 results mainly from the reduction in additions to rolling stock, the relative cost in 1960 being about one quarter of that in the peak year—1957, and less than one third of the average for the four years, 1956-1959.

The above figures do not include Government of Canada expenditures on Canadian Government Railways.

Upon the retirement of the remaining steam locomotives in 1960, a further capital write-off of \$26,651,968 was charged against shareholders' equity, bringing the aggregate so charged over the past three years to \$36,555,118.

Such write-offs have not, therefore, formed part of the System deficits nor reduced accumulated depreciation.

CANADIAN NATIONAL RAILWAYS—Continued

INVESTMENTS IN AFFILIATED COMPANIES NOT CONSOLIDATED

Additions during 1960 amounted to \$75,229,616 of which \$74,000,000 applied to Trans-Canada Air Lines, bringing the total investment in and advances to this company to \$214,100,000.

LONG TERM DEBT

During the year there was an increase of \$141,586,921 in long term debt, being a net increase of \$339,249,273 in issues to the public and a reduction of \$197,662,352 in the Government of Canada loans and debentures.

As regards the \$700,000,000 bonds issued during 1959 and 1960, amounts of $\frac{1}{2}\%$ or 1% of the respective original issues may be purchased quarterly provided the bonds are available in the open market at prices not exceeding the relative original issue prices. During 1960, bonds of a par value of \$7,750,000 were purchased under this authority. To implement this condition in full, the annual cash requirement in future years might be in excess of \$16,000,000.

Debenture stock and equipment trust certificates in an aggregate of \$3,000,727 were redeemed during the year. The remaining \$675,000 equipment trust certificates outstanding at December 31, 1960 were subsequently redeemed on January 15, 1961.

It will be seen that temporary advances by the Government of Canada under Financing and Guarantee Acts stood at \$31,037,938 at December 31, 1960, the lowest at any year-end since 1955.

Discount of \$8,871,350 on new bonds issued during the year has been added to Unamortized Discount on long term debt. At December 31, 1960 the unamortized balance in this account was \$26,762,278.

SOURCE OF FUNDS

The proceeds from sale of preferred stock were the lowest in any year since 1955, as a result of the decrease in Railway operating revenues.

If the financial requirements of Trans-Canada Air Lines are deducted, the net increase in long term debt in 1960 will also be found to be the lowest during the same period. This is a reflection of the completion of the dieselization programme, the reduction in the purchase of other equipment, mainly freight, and of the increase in the funds provided through somewhat higher depreciation accruals.

SHAREHOLDERS' EQUITY

Government of Canada equity decreased during 1960 by an amount of \$2,766,560 as under:

| | |
|--|---------------------|
| Capital write-off arising from early retirement of remaining steam locomotives | 26,651,968 |
| Less: Additional preferred stock issued | 21,096,001 |
| Increase in investment in Canadian Government Railways | 2,789,407 |
| | <u>23,885,408</u> |
| Decrease | <u>\$ 2,766,560</u> |

INSURANCE FUND AND RESERVE

At December 31, 1960 the Fund consisted of the following:

| | |
|---|---------------------|
| Securities—at cost or amortized value | 14,642,842 |
| Cash, accrued interest, etc., less accounts payable | 357,158 |
| | <u>\$15,000,000</u> |

The value of the above securities, based on market quotations, was approximately 15% lower than as shown above, as compared with 21% at December 31, 1959—a recovery of about \$855,000.

At December 31, 1960 there were some 325 outstanding claims of varying amounts, the respective cost of which had not been completely established. The aggregate amount which will eventually be charged against the reserve in this connection has been estimated at \$800,000.

RESULTS OF OPERATIONS—YEAR 1960

The deficit from all operations for the year was \$67,496,777, an increase of \$23,908,487 over that for 1959.

There was a decline in the overall Railway operating revenues, offset in part by reductions in operating expenses and in pension costs under the revised method of funding.

CANADIAN NATIONAL RAILWAYS—*Concluded*

Charges to operations for depreciation were slightly higher, with another sharp increase in fixed charges, due in large part to the higher level of interest rates.

No provision has been made in the 1960 accounts for any retroactive costs which might result from wage negotiations in progress.

PENSIONS

Attention is respectfully directed to Note 4 to the Consolidated Financial Statements which describes the change in the method of funding of liabilities under the 1935, 1952 and 1959 Pension Plans and its effect on the annual charge to operations.

Such charge now includes a contribution related to current service and an amount for interest on the acknowledged outstanding liability of the company in respect of prior service of active employees, as established by actuarial appraisal at \$325,000,000. While this indebtedness is not included in the liabilities as shown in the Consolidated Balance Sheet of the System except by reference in the above-mentioned Note, it does appear as an asset in the Pension Trust Funds Balance Sheet, thus giving a lucid presentation of the position of such Funds at December 31, 1960.

CORPORATE STRUCTURE

During the year 1960 there was a further reduction in the number of companies comprised in the System through the amalgamation of five railway companies and the dissolution of two land companies.

On the other hand, trucking services were extended through the acquisition of four trucking and two terminal holding companies, the assets and liabilities of which have been incorporated under the relative classifications in the Consolidated Balance Sheet of the System.

GENERAL

The cost, including interest, of track diversion and rearrangement of approaches to Victoria Jubilee Bridge is being accumulated in an account classified under Other Assets in the balance sheet, pending settlement with the St. Lawrence Seaway Authority.

Further progress was made during the year in the modernization and improvement in the accounting methods and procedures. In addition, steps have been taken to modify the accounting system to meet the needs under the new Management Organization Structure. In view of the size and complexity of the overall undertaking of the System, the full benefits from these changes and improvements can, of course, only be achieved over an extended period.

I wish to take this opportunity of expressing my appreciation to the officers and staff of the System for their full co-operation and assistance throughout the year.

Yours faithfully,

J. A. DE LALANNE,
Chartered Accountant.

THE CANADIAN NATIONAL RAILWAYS SECURITIES TRUST

Montreal, February 21, 1961.

THE HONOURABLE LEON BALZER, P.C., Q.C., M.P.,
MINISTER OF TRANSPORT,
OTTAWA.

Sir,

In conformity with Section 17 of the Canadian National Railways Capital Revision Act, 1952, the Trustees of The Canadian National Railways Securities Trust submit the following report of the transactions for the calendar year 1960.

Consistent with the procedure followed in 1958, the book value of the capital stock has been decreased during the year by \$26,651,968 due to capital losses of Canadian National Railways in 1960 arising from the early retirement of steam locomotives and the insufficiency of the related reserve for depreciation. The total of such losses charged to capital stock up to December 31, 1960 amounted to \$36,555,118.

The Trustees present herewith the Balance Sheet at December 31st, 1960.

D. GORDON,
For the Trustees.

EXPORT CREDITS INSURANCE CORPORATION—Concluded

AUDITOR GENERAL OF CANADA

Ottawa, March 20, 1961.

THE HONOURABLE GEORGE H. HEES,
MINISTER OF TRADE AND COMMERCE,
OTTAWA.

Dear Sir,

The accounts and financial statements of Export Credits Insurance Corporation have been examined for the year ended December 31, 1960.

Section 11A.(2) of the Export Credits Insurance Act provides that the net earnings of the Corporation each year shall be transferred to the Underwriting Reserve until such time as said Reserve totals \$5,000,000. Pursuant to this requirement the net earnings of this Corporation from its inception on November 21, 1944 to December 31, 1959 have been transferred to the credit of the Underwriting Reserve which totalled \$4,905,479 at the latter date. It will be noted from the Statement of Operations of the Corporation for the year ended December 31, 1960 that the sum of \$94,521 has been similarly transferred to the Underwriting Reserve out of the net earnings of the Corporation for the year under review, with the result that the Reserve amounted to \$5,000,000 at December 31, 1960, as required by Section 11A.(2) of the Act.

In compliance with the requirements of section 87 of the Financial Administration Act, I now report that, in my opinion:

- (a) Proper books of account have been kept by the Corporation;
- (b) The financial statements of the Corporation
 - (i) were prepared on a basis consistent with that of the preceding year and are in agreement with the books of account,
 - (ii) in the case of the statement of assets and liabilities, give a true and fair view of the state of the Corporation's affairs as at the end of the financial year, and

- (c) the transactions of the Corporation that have come under my notice have been within the powers of the Corporation under the Financial Administration Act and any other Act applicable to the Corporation.

FARM CREDIT CORPORATION—Concluded
AUDITOR GENERAL OF CANADA

Ottawa, June 28, 1961.

THE HONOURABLE ALVIN HAMILTON,
MINISTER OF AGRICULTURE,
OTTAWA.

Dear Sir,

The accounts and financial statements of the Farm Credit Corporation have been examined for the year ended March 31, 1961.

The interest rate of $5\frac{1}{2}$ per cent per annum which applied to borrowings from the Government of Canada during the last half of the preceding fiscal year also applied to \$15,000,000 borrowed during the first half of the year under review. The interest rate on borrowings during the latter half of the year was 5 per cent. Section 16(c) of the Farm Credit Act sets an interest rate of 5 per cent per annum on all loans made by the Corporation under the Act. It is estimated that during the period of repayment the Corporation will suffer a loss of \$3,000,000 on the \$30,800,000 borrowed from the Government of Canada at $5\frac{1}{2}$ per cent and which was loaned to farmers at 5 per cent per annum.

In compliance with the requirements of section 87 of the Financial Administration Act, I now report that, in my opinion:

- (a) proper books of accounts have been kept by the Corporation;
- (b) the financial statements of the Corporation
 - (i) were prepared on a basis consistent with that of the preceding year and are in agreement with the books of account,
 - (ii) in the case of the balance sheet, give a true and fair view of the state of the Corporation's affairs as at the end of the financial year, and
 - (iii) in the case of the statement of income and expense, give a true and fair view of the income and expense of the Corporation for the financial year; and
- (c) the transactions of the Corporation that have come under my notice have been within the powers of the Corporation under the Financial Administration Act and any other Act applicable to the Corporation.

Yours faithfully,

A. M. HENDERSON,
Auditor General.

THE ST. LAWRENCE SEAWAY AUTHORITY—Continued

AUDITOR GENERAL OF CANADA

Ottawa, March 30, 1961.

THE HONOURABLE LEON BALZER,
MINISTER OF TRANSPORT,
OTTAWA.

Sir,

The accounts and financial statements of The St. Lawrence Seaway Authority have been examined for the year ended December 31, 1960.

Section 25 of the St. Lawrence Seaway Authority Act provides that the Minister of Finance, with the approval of the Governor in Council, may from time to time make loans to the Authority. Section 13 of the Act, as amended, states that the aggregate of the amounts so borrowed under the Act and outstanding shall not at any time exceed \$335,000,000.

The accompanying balance sheet of The St. Lawrence Seaway Authority shows that the Authority was indebted to the Government of Canada on December 31, 1960 in respect of loans and unpaid interest thereon in the total amount of \$334,575,700, made up as follows:

| | |
|---|-----------------------|
| Loans under section 25 of the Act | 305,500,000 |
| Interest on loans—matured and capitalized | 19,427,117 |
| Interest on capital debt unpaid for year 1960 | 9,648,583 |
| | <u>\$ 334,575,700</u> |

During the year ended December 31, 1960 the Authority borrowed \$20,000,000 from the Government of Canada and repaid from its 1959 net earnings \$5,000,000 in reduction of the interest on loans matured and capitalized. During the subsequent period January 1, 1961 to March 30, 1961 the Authority borrowed a further amount of \$15,000,000 of which principal amount \$9,648,583 was repaid to the Government to cover the interest unpaid on the capital debt for the year ended December 31, 1960, shown above. As at March 30, 1961 the Authority was indebted to the Government of Canada in respect of loans and unpaid interest thereon in the total amount of \$339,927,117 exclusive of interest accrued for the period since January 1, 1961.

Section 16 of the Act requires that tolls be designed to provide a revenue sufficient to defray the cost to the Authority of its operations, which costs, in addition to those of operating and maintaining the canals and works, are defined under subsections (a) and (b) as being payments in respect of the interest on amounts borrowed by the Authority and amounts sufficient to amortize the principal of amounts so borrowed over a period not exceeding fifty years. Pursuant to these provisions, loans made to the Authority under section 25 of the Act require the payment of interest only in the first three full years of operation (through the year ending December 31, 1962) and thereafter payment of annual amounts sufficient to amortize over a period of forty-seven years (or by December 31, 2009) all loans and interest thereon.

The costs of operating and maintaining the canals and works under the administration of the Authority are defined under subsection (c) of section 16 as including all operating costs of the Authority and such reserves as may be approved by the Minister. The necessity of including depreciation as an element of operating and maintenance cost has been reviewed by the Authority in whose opinion the amortization over the fifty year period of the principal of the amounts borrowed together with interest as required by subsections (a) and (b) meets the requirements of the Act. Accordingly, no provision for depreciation has been included in the costs for the year under review and the Authority has reversed the provision for depreciation made during its fiscal year ended December 31, 1959 in the sum of \$4,062,505. An amount of \$144,298 was provided during the year under review toward the cost of replacement of movable equipment having an estimated lifetime of less than fifty years.

THE ST. LAWRENCE SEAWAY AUTHORITY—*Concluded*

In compliance with the requirements of section 87 of the Financial Administration Act, I now report that, in my opinion, subject to the above observations:

- (a) proper books of account have been kept by the Authority;
- (b) the financial statements of the Authority
 - (i) were prepared on a basis consistent with that of the preceding year save for the discontinuance of the depreciation charge as explained above, and are in agreement with the books of account,
 - (ii) in the case of the balance sheet, give a true and fair view of the state of the Authority's affairs as at the end of the financial year, and
 - (iii) in the case of the statement of income and expense, give a true and fair view of the income and expense of the Authority for the financial year; and
- (c) the transactions of the Authority that have come under my notice have been within the powers of the Authority under the Financial Administration Act and any other Act applicable to the Authority.

Yours faithfully,

A. M. HENDERSON,
Auditor General.

TRANS-CANADA AIR LINES—Continued

J. A. DE LALANNE

CHARTERED ACCOUNTANT

507 PLACE D'ARMES, MONTREAL

February 10, 1961.

TO THE HONOURABLE THE MINISTER OF TRANSPORT,
OTTAWA, CANADA.

Sir:

As auditor of Trans-Canada Air Lines, I report, through you, to Parliament on my audit of the accounts for the year ended December 31, 1960.

I have signed a separate report in the following terms which, together with the related financial statements, is included in the annual report of the Corporation.

"I have examined the balance sheet of Trans-Canada Air Lines as at December 31, 1960 and the statement of income for the year ended on that date. My examination included a general review of the accounting procedures and such tests of accounting records and other supporting evidence as I considered necessary in the circumstances.

In my opinion, the accompanying balance sheet and the related statement of income are properly drawn up, in accordance with generally accepted accounting principles applied on a basis consistent with that of the preceding year, so as to give a true and fair view of the state of the affairs of the Corporation at December 31, 1960 and of the results of its operations for the year ended on that date, according to the best of my information and the explanations given to me and as shown by the books of the Corporation.

I further report that, in my opinion, proper books of account have been kept by the Corporation and the transactions that have come under my notice have been within the powers of the Corporation."

I offer the following further comments—

CURRENT POSITION—WORKING CAPITAL

There was an increase of \$6,025,352 in working capital during the year attributable as under:

Funds Provided from—

| | |
|--|------------|
| Depreciation | 13,671,303 |
| Net increase in advances by Canadian National Railways | 74,000,000 |
| Assets retired | 4,246,171 |
| Less: Amount charged against accumulated depreciation | 2,313,901 |
| | <hr/> |
| | 89,603,573 |

Funds Applied to—

| | |
|--|--------------|
| Additions to property and equipment including progress payments on capital commitments | 82,213,968 |
| Training costs to be amortized | 1,364,253 |
| | <hr/> |
| Net Increase in Working Capital | \$ 6,025,352 |

TRANS-CANADA AIR LINES—Continued

CAPITAL ASSETS

Property and Equipment

There was an increase of \$75,478,664 during the year in the net investment in property and equipment, accounted for as under:

Additions

| | |
|--|------------|
| Aircraft and component parts—including 7 DC8's and 3 Vanguards | 58,521,398 |
| Ground facilities and components including Dorval overhaul and maintenance base .. | 32,730,970 |

91,252,368

Less: Assets retired including—

| | |
|--------------------------------------|-----------|
| 1 Super Constellation, | |
| 2 DC3's and 1 Hangar at Dorval | 4,246,171 |

\$7,006,197

Increase in Accumulated Depreciation 11,527,533

Net Increase in Property and Equipment \$75,478,664

Depreciation has been provided on a "straight line" method as follows:

Aircraft—to reduce to residual values over periods of years from date of being put into service.

North Star and DC3—reduced to residual value in prior years.

Super Constellation —over seven years with a special rate for 1 aircraft acquired under a re-purchase agreement.

Viscount —over nine years.

DC8 —over ten years.

Vanguard —none in service at December 31, 1960.

Ground Facilities —to amortize over estimated useful life, the period depending upon the type of asset.

In accordance with the Corporation's policy of not depreciating aircraft until they are placed in service, no depreciation has been provided on Vanguard aircraft acquired in 1960.

Progress Payments

These amounted to \$58,537,217 at December 31, 1960 and were \$8,888,512 lower than at the end of the previous year.

They apply to the following commitments, including capitalized interest:

| | |
|--|------------|
| 3 Douglas DC8's for delivery in 1961, including spare equipment | 16,833,284 |
| 17 Vickers Vanguards for delivery in 1961, including spare equipment | 39,240,638 |
| Buildings and ground equipment | 2,463,295 |

\$58,537,217

Further payments totalling \$35,000,000 remain to be paid either prior to or on completion of unfinished contracts.

LOANS AND DEBENTURES

During the year there was a net increase of \$74,000,000 in the loans and debentures payable to Canadian National Railways, being advances of \$78,000,000 less repayments of \$4,000,000. Demand notes aggregating \$113,906,000 were converted to debentures during 1960.

Notes and debentures outstanding at December 31, 1960 become payable as follows:

Demand notes—3.5% 27,000,000

Debentures—

% of \$100,000 each Maturing

| | | |
|-------------|-------------------------|------------|
| 5.97 | December 15, 1964 | 34,994,000 |
| 4.745 | April 1, 1967 | 29,340,000 |
| 5.23 | May 15, 1968 | 2,680,000 |
| 3.875 | January 1, 1973 | 20,000,000 |
| 5.22 | May 15, 1977 | 4,020,000 |
| 4.25 | February 1, 1981 | 6,500,000 |
| 5.94 | January 1, 1985 | 17,497,000 |
| 5.235 | October 1, 1987 | 67,069,000 |

182,100,000

Total \$209,100,000

It will be noted that interest charges on the above will exceed \$10,000,000 per annum. This results from the heavy additional investment in equipment coupled with a sharp increase in the average interest rate to approximately 5%.

TRANS-CANADA AIR LINES—Continued

MATERIALS AND SUPPLIES

Inventories rose during the year by approximately \$5,000,000 as a result of provisioning for DC8 and Vanguard fleets.

The method of valuation is consistent with that followed in prior years.

UNAMORTIZED TRAINING COSTS

The introduction of new types of aircraft has increased substantially the cost of training of air and ground crews.

The Corporation has adopted a policy, consistent with the industry practice, of deferring the relevant training expenses. The period for amortization has been fixed at four years.

The amount so deferred at December 31, 1960 was \$1,384,495.

INSURANCE FUND AND RESERVE

There was a reduction of \$155,799 in the fund during the year represented by—

| | |
|--|-------------------|
| Claims against the fund | 1,389,828 |
| Less: Interest earned on securities | 226,739 |
| Accruals to the fund—charged to operations | 1,007,290 |
| | <u>1,234,029</u> |
| | <u>\$ 155,799</u> |

At the end of the year the fund was comprised of—

| | |
|---|---------------------|
| Securities—at cost | 6,318,740 |
| Cash and accrued interest | 64,706 |
| | <u>6,383,446</u> |
| Less: Amount payable to Corporation | 693,379 |
| | <u>\$ 5,690,067</u> |

The quoted market value of securities at December 31, 1960 was 13.5% lower than cost as compared with 18% at the end of the previous year—or a recovery of \$288,600.

RESERVE FOR PROPERTIES, PLANT AND EQUIPMENT

In view of the imminent retirement of the three piston engine aircraft fleets and of the present indication that the Corporation may ultimately experience a substantial write-off in disposing of the relative assets, the balance in Surplus Account at January 1, 1960 has been appropriated to establish a properties reserve against this contingency.

STATEMENT OF INCOME

Income from operations, before providing for depreciation, was \$165,322 higher than in 1959.

On the other hand, there were substantially higher depreciation and interest charges made up of increases in—

| | |
|---|---------------------|
| Depreciation | 1,526,221 |
| Interest on loans and debentures | 4,366,741 |
| | <u>5,892,962</u> |
| Less: Increases in non-operating income mainly attributable to interest capitalized and interest earned on aircraft progress payments | 2,967,736 |
| | <u>\$ 2,925,226</u> |

The resulting deficit of \$2,607,350 for the year 1960 has been shown as recoverable from the Government of Canada and offset against advances.

TRANS-CANADA AIR LINES—*Concluded*

GENERAL

Where applicable, foreign currencies at December 31, 1960 have been converted at rates similar to those in effect in prior years—viz. United States dollars at par and Sterling at \$2.80 to the pound.

I wish to take this opportunity of expressing my appreciation to the officers and staff of the Corporation for their full co-operation and assistance throughout the year.

Yours faithfully,

J. A. DE LALANNE,
Chartered Accountant.
